

Supreme Arrogance

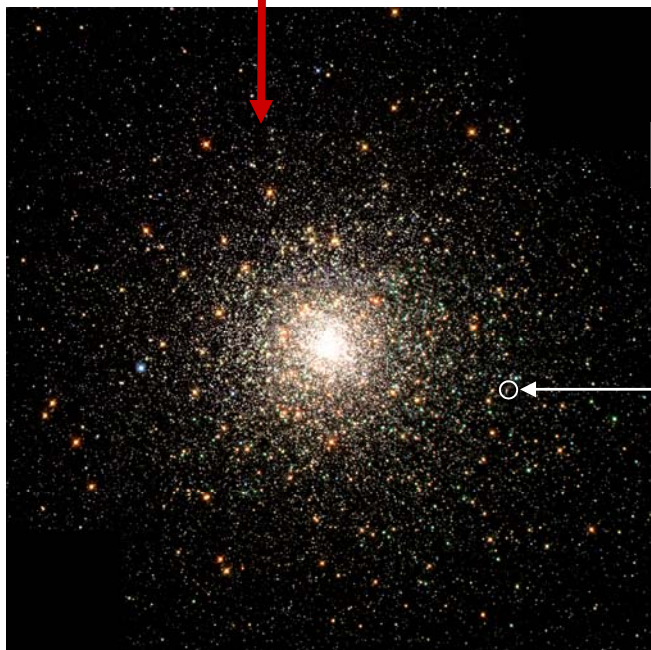

Deep Space
Billions and Billions and
Billions ... of GALAXIES

Our Milky Way galaxy

Our Milky Way galaxy...
200+ billions of stars
100,000 light years across

Our star cluster...
(in the fringe of our galaxy)

Our star cluster

Our Star (Our Sun)

You can't see our tiny dark planets,
but on one of these planets (Earth)
man insists,

"I know the true God!"

**Please point
to the man
that knows
the true God.**
